

# Complete protection and safety made easy

System pro *M* portfolio  
of DIN rail devices

- Safety and reliability at its best
- One portfolio – easy selection
- Uncompromised fulfilling of local requirements
- Technology leadership

—  
**The System pro *M* portfolio offers a complete solution of line protection, designed to work across all applications; delivering an uncompromised level of performance and safety.**

**This series of devices including Miniature Circuit Breaker (MCB), Residual Current Circuit Breaker (RCCB) and Switch Disconnectors are fully ISI certified and innovated with the same expertise and technological know-how as the original MCB first invented by ABB almost one hundred years ago.**

**System pro *M* portfolio is an easy choice, thanks to its compact portfolio, simplified yet intuitive design and full functionality. Furthermore, this universal range of products compliments a wide assortment of accessories that cater to the residential, commercial, industrial and OEM markets.**

SYSTEM PRO M PORTFOLIO

Designed to work across all applications; delivering an uncompromised level of performance and safety in residential, commercial and industrial applications.

# Performance and safety

Our complete range of DIN rail is perfect for meeting all installation needs in residential, commercial and industrial sectors.

Universal range enables complete portfolio of accessories with protection functionality and safety.

The range complies with relevant international standards. Ensuring maximum safety to the household and complete protection to the electrical installation.

MCBs comply to IEC/EN 60898-1 and IEC/EN 60947-2 and carry all relevant approval marks for each market and segment they are destined to.

This range is designed to meet the needs of distribution and protection of electricity.

# Value Proposition

## Complete protection and safety made easy

### Safety and reliability at its best

- Protection from over-currents, earth leakage, accidental electric shock and earth fault currents
- Guaranteed safety and reliability, thanks to multiple automated testing of each single product

### Uncompromised fulfilling of local requirements

- ISI approval for the whole range

### One portfolio – easy selection

- Single and complete portfolio with a high rated voltage (240/415 V)
- Covering requirements for residential, commercial and industrial installations
- Easy selection of products

### Technology leadership

- Original technology invented and established by ABB
- Patented in 1924 and continuously further improving the technology

The System pro *M* portfolio offers a complete solution of line protection, designed to work across all applications; delivering an uncompromised level of performance and safety.

This series of devices including Miniature Circuit Breaker (MCB), Residual Current Circuit Breaker (RCCB) and Isolator is fully ISI certified and innovated with the same expertise and technological know-how as the original MCB first invented by ABB almost one hundred years ago.

System pro *M* portfolio is an easy choice, thanks to its compact portfolio, simplified yet intuitive design and full functionality. Furthermore, this universal range of products compliments a wide assortment of accessories that cater to the residential, commercial, industrial and OEM markets.

# System pro M

## Portfolio overview

With the ABB System pro M portfolio, we offer a complete system solution including MCBs, RCCBs, RCBOs, SDs, busbars accessories and consumer units.

### MCB – Miniature Circuit Breaker

- Protect installations against overloads and short-circuit, guaranteeing reliability and safety of operations
- SB200 M MCB with breaking capacity of 10kA
- B characteristic, 1/2/1P+N pole configurations in all sizes up to 40A.
- C characteristic in 1/2/3/4/1P+N/3P+N Pole configurations in all sizes up to 63A
- D characteristic in 1/2/3/4 Pole configurations in all sizes up to 63A

### RCCB – Residual Current Circuit Breaker

- Sensitive only to earth fault current, therefore they have to be connected in series with a MCB or a fuse to protect them against over-currents and short-circuits
- FB200 RCCB with sensitivity 30/100/300mA in AC type and 2/4P configuration up to 63A, corresponding to all requirements in residential applications

### RCBO

- Combined protection against both earth-fault currents and overloads or short-circuits in one single device
- DS201 M RCBO with breaking capacity 10kA
- C characteristics, AC and APR types, 30/100/300mA sensitivity and 2P+N configuration up to 40A

### SD – Switch disconnecter

- Opening a disconnecter ensures isolation of downstream circuit
- SDB200 with 2/3/4P configurations in all sizes up to 63A

### Accessories

- Busbar with 12/56/57 pins in 1/2/3/4P to ensure easy and reliable wiring

ABB ITUS distribution enclosures

## A collaborative effort

### Meeting the right requirements

ABB ITUS series Distribution Enclosures put no limits to your imagination. Gone are the days when enclosures were meant only for archaic needs. With the ABB ITUS series enclosures, you can rest assured that it will not only perform at its peak, but also blend in with the rest of your interiors. Using ABB's innovative designs, domain expertise and standards, ABB ITUS is ready to help you to be today's trendsetter.

# Miniature Circuit Breaker SB200 M

## The details make the difference

### State-of-the-art design (Aesthetics & Ergonomics)

Elegant in appearance. Knob designed for easy operation.

### Laser marking

All printing of the SB200 M MCBs, like the approvals on the product identification, are printed by a laser. Laser printing ensures a friction, scratch and solvent resistant marking on the MCBs. Easy identification of the products in case of maintenance or replacement, due to safe laser printing.

### Housing cover with fire retardant material

High performance 100% recyclable plastic material with fire retardant, high melting point, low water absorption & high dielectric strength properties. ABB is taking care of the environment... with the latest generation of thermoplastics, it is possible to recycle the MCBs – especially the thermoplastic housing material can be re-used. SB200 is 100% free of halogens.

### IP20 protection

IP 20 - finger safe terminals. The System pro M compact® MCBs are equipped with 25 mm<sup>2</sup> cylinder lift twin terminals, a well-proven and reliable technology - designed for sophisticated industrial use. The cross wiring can easily be done by inserting the System pro M compact® busbars into the rear terminal part and then the incoming wires into the front part of the terminal.

### Labelling area

Provision for providing label enables easy identification of circuit during installation, operation & maintenance.

### Accessories mountable

Wide range of add-on accessories having 30 different types of accessories. Max possibility of Mounting: 4 different accessories on the right side and 1 on the left side ensures highest flexibility of functions. Universal contact, motorised unique accessory like mechanical tripping devices available only with ABB.

## Miniature Circuit Breaker SB200 M

### Technical data

General data	
Standards	IS/IEC 60898-1
Poles	B: 1P, 1P+N, 2P C: 1P, 2P, 3P, 4P, 1P+N, 3P+N D: 1P, 2P, 3P, 4P
Rated short-circuit capacity (I <sub>cn</sub> )	10 kA
Rated ultimate short-circuit breaking capacity I <sub>cu</sub> (acc.to IEC 60947-2)	15 kA
Tripping characteristics	B, C, D
Reference temperature for tripping characteristics	30°C
Energy limiting class (B-,C- Curve)	3
Rated voltage U <sub>e</sub>	1P : 240/415 V AC 1P + N : 240 V AC 2...4P : 415 V AC 3P + N : 415 V AC
Rated current I <sub>n</sub>	B: 6, 10, 16, 20, 25, 32, 40 A C&D: 0,5, 1, 1,6, 2, 3, 4, 6, 10, 16, 20, 25, 32, 40, 50, 63 A
Rated frequency	50 Hz
Max. Power frequency recovery voltage (U <sub>max</sub> )	1P: 264 V AC; 60V DC; 1P+N:264 V AC; 2...4P : 457 V AC; 2P: 120V DC; 3P+N: 457 V AC
Min. operating voltage	12 V AC
Rated insulation voltage U <sub>i</sub> acc. to IEC/EN 60664-1	250 V AC (phase to ground) , 440 V AC (phase to phase)
Rated impulse withstand voltage U <sub>imp</sub> . (1.2/50μs)	4 kV (test voltage 6.2kV at sea level, 5kV at 2.000m)
Dielectric test voltage	2 kV (50 / 60Hz, 1 min.)
Overvoltage category	III
Pollution degree	2
Electrical endurance	I <sub>n</sub> < 32A: 20.000 ops.(AC), I <sub>n</sub> ≥ 32A: 10.000 ops.(AC); 1.000 ops. (DC); 1 cycle (2s - ON, 13s - OFF, I <sub>n</sub> ≤ 32A), 1 cycle (2s - ON, 28s - OFF, I <sub>n</sub> >32A)
Mechanical data	
Housing	Insulation group II
Toggle	Insulation group II, black, sealable
Contact position indication	White Marking on toggle ( I ON / O OFF )
Protection degree acc. to EN 60529	IP20, IP40 in enclosure with cover
Mechanical endurance	20.000 ops.
Shock resistance acc. to IEC/EN 60068-2-27	25 g - 2 shocks - 13 ms
Vibration resistance acc. to IEC/EN 60068-2-6	5g - 20 cycles at 5...150...5 Hz with load 0.8I <sub>n</sub>
Environmental conditions (damp heat) acc. to IEC/EN 60068-2-30	28 cycles with 55°C/90-96% and 25°C/95-100%
Ambient temperature	-25 ... +55°C
Storage temperature	-40 ... +70°C

<b>Installation</b>	
Terminal	Cage terminal
Cross-section of conductors (top / bottom) Solid, Stranded	25 mm <sup>2</sup> / 25 mm <sup>2</sup>
Flexible	16 mm <sup>2</sup> / 16 mm <sup>2</sup>
Cross-section of busbars (top / bottom)	10 mm <sup>2</sup>
Tightening torque	2 Nm
Screwdriver	No. 2 Pozidrive
Mounting	On DIN rail 35 mm acc. to EN 60715 by fast clip
Mounting position	Any
Supply	Optional
<b>Dimensions and weight</b>	
Mounting dimensions acc. to DIN 43880	Mounting dimension 1
Pole dimensions (H x D x W)	85 x 69 x 17.5 mm
Pole weight	ca. 115 g
<b>Combination with aux. elements</b>	
Auxiliary contact	yes
Signal contact	yes
Shunt trip	yes
Undervoltage release	yes
Overvoltage release	yes
Rotary handle	yes
Mechanical tripping device	yes
Padlock enabled	yes
Motor operating device	yes
<b>Approvals</b>	
ISI approved	yes

## MCB SB200 M D characteristic

### Ordering data

#### SB200 M D characteristic

Function: protection and control of the circuits against overloads and short-circuits; protection for resistive and inductive loads with low inrush current.

Applications: residential, commercial and industrial

Standard: IEC/EN 60898-1, IEC/EN 60947-2

Icn=10 kA

# Residual Current Circuit Breaker FB200

A range designed to ensure efficiency and protection.

Bi-directional cylindrical terminal ensures higher safety of connecting operations, making them easier.

Test push-button to verify the correct functioning of the device.

Information on the device is laser printed to make it clearly visible and long lasting.

Laser-marked order code on the front to make easier future orders.

### ISI and CE marking

In addition to international standards and markings IEC, the product is certified as per latest Indian Standards (ISI).

### High performance

- Rated breaking capacity and rated residual breaking capacity laser printed on the device:  
 $I_m = I_{\Delta m} = 1000 \text{ mA}$
- Co-ordination with a 63 A rated current with conditional short-circuit capacity  $I_{nc} = 10000 \text{ A}$ .

### Accessories mountable

Wide a range of add-on accessories having 30 different types of accessories. Max. possibility of mounting: 4 different accessories on the right side and 1 on the left side ensures highest flexibility of functions. Universal contact, motorised unique accessory like mechanical tripping devices available only with ABB.

### Termination

The availability of two terminals offers different connection solutions thanks to the possibility to connect two independent cables in the same device: the second terminal can be used for an auxiliary circuit or for the supply of devices with small section cables without connecting them together with the main circuit.

### Auto reclosing

The FB200 can be coupled with the auto reclosing unit F2C-ARH in order to ensure continuity of service for the whole installation of your home, avoiding lack of supply.

### Dual termination

Two terminals are available, the fore one for cables up to 25 mm<sup>2</sup>, the back one for cables up to 10 mm<sup>2</sup> or for busbars.

## RCCB FB200

### Technical data

<b>General data</b>	
Standards	IEC 61008; IS 12640-1: 2008
Poles	2 P, 4 P
Rated current I <sub>n</sub>	25 A, 40 A, 63 A
Rated residual operating current I <sub>Δn</sub>	30 mA, 100 mA, 300 mA
Type (wave form of the earth leakage sensed)	AC
Rated voltage U <sub>e</sub>	240 / 415 V AC
Rated insulation voltage U <sub>i</sub> acc. to IEC/EN 60664-1	500 V AC
Max. operating voltage of circuit test	254 V AC
Min. operating voltage of circuit test	110 V AC
Rated frequency	50 Hz
Rated conditional short-circuit current I <sub>nc</sub> =I <sub>Δc</sub>	10 kA (with a SCPD)
Rated residual breaking capacity I <sub>Δm</sub> =I <sub>m</sub>	1 kA
Rated impulse withstand voltage (1.2/50) U <sub>imp</sub>	4 kV
Dielectric test voltage	2,5 kV
Surge current resistance (wave 8/20)	250 A
Electrical endurance	10.000 ops.
<b>Mechanical Data</b>	
Toggle	Black, sealable in ON-OFF position
Contact position indication	White Marking on toggle ( I ON / O OFF )
Protection degree acc. to EN 60529	IP20, IP40 in enclosure with cover
Mechanical endurance	20.000 ops.
Environmental conditions (damp heat) acc. to IEC/EN 60068-2-30	Humid heat: 28 cycles with 55°C/95...100%; constant climate conditions: 23°C/83% - 40°C/93% - 55°C/20%; variable climate conditions: 25°C/95% - 40°C/95%
Ambient temperature	-5...+40°C
Storage temperature	-40...+70°C
<b>Installation</b>	
Terminal	Failsafe bi-directional cylinder-lift terminal at top and bottom (shock protected)
Cross-section of conductors (top / bottom)	Solid, Stranded 25 mm <sup>2</sup> / 25 mm <sup>2</sup>
Cross-section of busbars (top / bottom)	10 mm <sup>2</sup> / 10 mm <sup>2</sup>
Tightening Torque	2,8 Nm
Screwdriver	No. 2 Pozidrive
Mounting	On DIN rail 35 mm acc. to EN 60715 by fast clip
Mounting position	Any
Supply	Optional

---

**Dimensions and weight**

---

Pole dimensions (H x D x W)	2P: 85 x 69 x 35 mm; 4P: 85 x 69 x 70 mm
Pole weight	2P: 200 g; 4P: 350 g

---

**Combination with aux. elements**

---

Auxiliary contact	yes
Signal contact	yes
Shunt trip	yes
Undervoltage release	yes
Overvoltage release	yes
Padlock enabled	yes

# Residual Current Circuit Breaker with overcurrent protection DS201 M

A range designed to ensure efficiency and protection.

Bi-directional cylindrical terminal ensures higher safety of connecting operations, making them easier.

Information on the device are laser printed to ensure readability over time.

Each RCBO of the DS201 M range is equipped with an Rfid tag containing a unique serial number assigned to ABB according to the standard ISO/IEC FCD 15693-3 in order to authenticate the product.

The label carrier to clearly identify the protected circuit.

Test pushbutton to verify the correct functioning of the device

Any earth fault can be immediately identified through the blue indicator, that signals the differential tripping and which cannot be activated in case of manual operation on the toggle. This prevents any misinterpretations of the device and system status.

Contact Position Indicator (CPI): to always know the status of the contacts (red: closed contacts; green: open contacts).

The terminals available on DS201 M make easier the supply operation in parallel with busbars as they are composed by two different seats, a front seat for 25 mm<sup>2</sup> cables and a back seat for 10 mm<sup>2</sup> busbars.

All the devices of the DS201 M series have been tested in a wide range of temperatures: from -25°C (as indicated by the snowflake marked on the front side) up to +55°C.

Label carrier for clear and reliable identification. With the practical label carrier fitted in the circuit breakers, you can give maximum visibility to the information relating to the protected loads.

All the quality ensured by the main international marks is clearly visible on the device even if installed in the switchboard.

Product description and EAN code laser printed on the lateral side of the device for easier stock management.

## RCBO DS201 M

10000  APR type, C characteristic

### DS201 M APR type, C characteristic

Function: protection against the effects of sinusoidal alternating and direct pulsating earth fault currents, providing an optimal compromise between safety and continuity of service, thanks to the resistance of unwanted tripping; protection against indirect contact and additional protection against direct contact ( $I\Delta n=30$  mA); protection and isolation of resistive and inductive loads.

**Application: residential, commercial, industrial**

**Standard: IEC/EN 61009-1; IEC/EN 61009-2-1**

**$I_{cn} = 10\,000$  A**

# Switch Disconnecter SDB200

The details make the difference

**Easy product coding – easy identification:** basic technical information already integrated into the name.

IP20 - finger safety.

Fully compatible with all System pro M devices and accessories.

**Patented housing design:** Environment-friendly and performance-optimized.

### Patented Housing Design

By using state-of-the-art housing material, ABB is taking care of the environment. With the latest generation of halogen-free thermoplastics for SDB200, it is possible to recycle the switch disconnectors completely without environmental pollution. The material works for the stability.

### Highest performance

With a rated voltage of 253/440 V AC, a rated conditional short-circuit current of 25 kA, terminals with protection from misconnection, a "Real CPI" switching position display, as well as full compatibility with all MCB accessories, the SDB200 is unique in its field of application. SDB200 complies with IEC/EN 60947-3.

### IP20 protection

IP 20 - finger safe terminals. The System pro M compact® MCBs are equipped with 25 mm<sup>2</sup> cylinder lift twin terminals, a well-proven and reliable technology - designed for sophisticated industrial use. The cross wiring can be easily done by inserting the System pro M compact® busbars into the rear terminal part and then the incoming wires into the front part of the terminal.

### Laser printing

All labels on the SDB200, as the approvals on the dome, technical details and the product identification, are printed by a laser. The laser printing ensures a friction, scratch and solvent resistant marking on the switch disconnectors for easy identification in case of maintenance or replacement. For control and acceptance procedure, it is important to see all markings also in the mounted position.

### ISI and CE marking

In addition to the International standards and markings IEC, the product is certified as per latest Indian Standards (ISI)

### Wide range of accessories

SDB200 is fully compatible to the complete range of System pro M compact accessories like:

- Auxiliary contacts, to be mounted on the left side, the right side or bottom fitting
- Shunt trips
- Undervoltage release
- Motor operating devices

## Switch Disconnecter SDB200

### Technical data

General data	
Standards	IS/IEC 60947-3
Poles	2P, 3P, 4P
Rated current I <sub>n</sub>	40, 63 A
Utilization category	AC-22A, DC-21B
Rated voltage U <sub>e</sub>	2...4P : 415 V AC
Insulation voltage U <sub>i</sub>	250/440 V AC
Max. power frequency recovery voltage (U <sub>max</sub> )	2...4P : 457 V AC; 2P: 120V DC
Min. operating voltage	12 V AC
Rated frequency	50 Hz, DC
Suitable for isolation	yes
Rated conditional short-circuit current	10 kA in series with NH 00 ≤ 63 A gG
Overvoltage category	III
Pollution degree	3
Rated impulse withstand voltage U <sub>imp</sub> . (1.2/50μs)	4 kV (test voltage 6.2kV at sea level, 5kV at 2.000m)
Dielectric test voltage	2 kV (50 / 60Hz, 1 min.)
Overvoltage category	III
Pollution degree	3
Electrical endurance	I <sub>e</sub> < 32 A: 20,000 ops. (AC), I <sub>e</sub> ≥ 32 A: 10,000 ops. (AC), 1,000 ops (DC)
Mechanical data	
Housing	Insulation group II
Toggle	Insulation group II, red, sealable
Contact position indication	White Marking on toggle ( I ON / O OFF )
Protection degree acc. to EN 60529	IP20, IP40 in enclosure with cover
Mechanical endurance	20.000 ops.
Shock resistance acc. to IEC/EN 60068-2-27	25 g - 2 shocks - 13 ms
Vibration resistance acc. to IEC/EN 60068-2-30	5g - 20 cycles at 5...150...5 Hz with load 0.8I <sub>n</sub>
Environmental conditions (damp heat) acc. to IEC/EN 60068-2-30	28 cycles with 55°C/90-96% and 25°C/95-100%
Ambient temperature	-25 ... +55°C
Storage temperature	-40 ... +70°C

<b>Installation</b>	
Terminal	Cage terminal
Cross-section of conductors (top / bottom) Solid, Stranded	25 mm <sup>2</sup> / 25 mm <sup>2</sup>
Flexible	16 mm <sup>2</sup> / 16 mm <sup>2</sup>
Cross-section of busbars (top / bottom)	10 mm <sup>2</sup>
Tightening torque	2 Nm
Screwdriver	No. 2 Pozidrive
Mounting	On DIN rail 35 mm acc. to EN 60715 by fast clip
Mounting position	Any
Supply	Any
<b>Dimensions and weight</b>	
Mounting dimensions acc. to DIN 43880	Mounting dimension 1
Pole dimensions (H x D x W)	85 x 69 x 17.5 mm
Pole weight	ca. 115 g
<b>Combination with aux. elements</b>	
Auxiliary contact	yes
Signal contact	yes
Shunt trip	yes
Undervoltage release	yes
Overvoltage release	yes
Rotary handle	yes
Mechanical tripping device	yes
Padlock enabled	yes
Motor operating device	yes
<b>Approvals</b>	
ISI approved	yes

# Miniature Circuit Breaker SB200 DC

## Right product for right application

The range impresses with its performance, approvals and high in-built short-circuit breaking capacity for DC applications. Can be used in SP version at 250V DC and DP version upto 500V DC.

Polarity marking.

IP20 - finger safety.

Captive screws.  
Don't lose what's important for you.

Whatever your application need is – applicable with a wide range of accessories.

Approvals and standard.

**State-of-the-art design  
(Aesthetics & ergonomics)**

Elegant in appearance and the knob is designed for easy operation.

**Laser marking**

All printing of the SB200 MCBs, like the approvals on the product identification are printed by a laser. The laser printing ensures a friction, scratch and solvent resistant marking on the MCBs. Easy identification of the products in case of maintenance or replacement, due to safe laser printing.

**Housing cover with fire retardant material**

High performance 100% recyclable plastic material with fire retardant, high melting point, low water absorption & high dielectric strength properties. ABB is taking care of the environment... with the latest generation of thermoplastics, it is possible to recycle the MCBs – especially the thermoplastic housing material can be re-used. SB200 is 100% free of halogens.

#### IP20 protection

IP 20 - finger safe terminals.  
The System pro M compact® MCBs are equipped with 25 mm<sup>2</sup> cylinder lift twin terminals, a well-proven and reliable technology - designed for sophisticated industrial use.  
The cross wiring can be easily done by inserting the System pro M compact® busbars into the rear terminal part and then the incoming wires into the front part of the terminal.

#### Labelling area

Provision for providing label enables easy identification and polarity marking of circuit during installation, operation & maintenance.

#### Accessories mountable

Wide range of add-on accessories having 30 different types of accessories. Max. possibility of mounting: 4 different accessories on the right side and 1 on the left side ensures highest flexibility of functions. Universal contact, motorised unique accessory like mechanical tripping devices available only with ABB.

## Miniature Circuit Breaker SB200 DC

### Technical data

## MCB SB200 DC C characteristic

### Ordering data

SB201 C 6 DC

#### SB200 DC characteristic

Function: protection and control of the circuits against overloads and short-circuits; protection for resistive and inductive loads with low inrush current.

Applications: residential, commercial and industrial

Standard: IS/IEC 60947-2

Icn=6 kA

#### SB201 DC C

## Auxiliary elements for

MCBs SB200 M, SB200 M DC, switch disconnecter SDB200 and RCBO DS201 M

Auxiliary elements

Auxiliary contact and signal/auxiliary contact		
S2C-S/H6R, S2C-H6R, S2C-H11L, S2C-H20L and S2C-H02L		
Utilization category		AC14 1A/400V, 2A/230V - DC12 1A/220V, 1,5A/110V - DC13 2A/60V, 4A/24V
Conventional free air thermal current	A	10
Min. operational current/voltage*		10 mA at 12 V; 5 mA at 24 V
Rated conditional short-circuit current	V	230 V AC 1,000 A with S201 K4
Overvoltage category		III
Rated impulse withstand voltage (1.2/50µs)	kV	4
Cross-section of conductors	mm <sup>2</sup>	0.75... 2.5 (up to 2 x 1.5 mm <sup>2</sup> for S2C-H11L, S2C-H20L and S2C-H02L)
Tightening torque	Nm	1.2 (max. 0.8 for S2C-H11L, S2C-H20L and S2C-H02L)
Contact stability in vibration test according to IEC/EN 60 068-2-6		5g, 20 sweep cycles 5...150...5 Hz at 24 V AC/DC, 5 mA automatic reclosing < 10 ms
Mechanical service life		10000 operations
Dimensions (H x D x W)	mm	85 x 69 x 8.8

Auxiliary contact and signal/auxiliary contact		
S2C-H6-11R, S2C-H6-20R, S2C-H6-02R		
Utilization category		AC14: 1A/400V, 2A/230V DC12/DC13: 1A/50V, 2A/30V
Conventional free air thermal current	A	10
Min. rated operational current/voltage*		10 mA at 12 V; 5 mA at 24 V
Rated conditional short-circuit current	V	230 V AC 1,000 A with S201 K4
Overvoltage category		III
Rated impulse withstand voltage (1.2/50µs)	kV	4
Cross-section of conductors	mm <sup>2</sup>	0.75... 2.5
Tightening torque	Nm	1.2
Contact stability in vibration test according to IEC/EN 60068-2-6		5g 20 sweep cycles 5... 150... 5 Hz at 24 V AC/DC. 5mA automatic reclosing < 10 ms
Mechanical service life		10000 operations
Dimensions (H x D x W)	mm	85 x 69 x 8.8

\* ensures safe contacting without current interruption by pollution layer

## Auxiliary elements for

MCBs SB200 M, SB200 DC, switch disconnector SDB200, RCCB-FB200 and RCBO-DS201 M

2C5C400465F0201

S2C-S/H6R

### Signal/auxiliary contacts

Signal contacts indicate if a device tripped due to a failure (overcurrent/short-circuit for MCBs and RCBOs; earth fault for RCCBs and RCBOs). Auxiliary contacts indicate the position of the contacts, independent if a failure occurred or the device was operated manually.

### S2C-S/H6R:

Choice through a selector between signal and auxiliary contact.

### S2C-H6R and S2C-HxxR:

Auxiliary contacts with contact configuration according to the following table. All right-side mounted contacts are suitable for MCBs, RCDs, switch disconnectors SDB200 according to the "Selection tables" which are displayed at the beginning of chapter 4.

2C5C400465F0201

S2C-H6-...

### S2C-HxxL:

Auxiliary contacts with contact configuration according to the following table. These contacts are left-side mounted and fit to SB200 MCBs and switch disconnectors SDB200 according to the "Selection tables". Especially when using a motor operating device this is a possibility to add a contact as the right side mounted ones do not fit within this combination.

### S2C-Hxx:

Unique bottom-fitting contact for the SB200 compact range SDB200 switch disconnectors. Simple and space-saving solution. Also intended for retrofitting.

### Shunt trips

Function: remote opening of the device when a voltage is applied. Suitable for MCBs SB200 series, RCBOs DS201 series, SDB200 switch disconnectors series.

Shunt trips use a coil like MCBs for tripping. To trip a shunt it is necessary to choose the right voltage and make sure the corresponding Ibmax (as mentioned in the table above) is provided by the power supply used. If the power supply can provide higher currents the shunt trip will reduce the current to Ibmax due to its internal resistance.

As soon as the shunt tripped, the contact inside is open – the electrical circuit is disconnected even if the shunt trip is still powered on. The free-tripping mechanism of the shunt trip allows a restart of the MCB only after the shunt trip gets no external release signal anymore.

### Overvoltage release

Function: monitoring voltage between the neutral and phase; when an overvoltage reaches the threshold value, the OVP device causes the tripping of the associated MCB or RCCB. Suitable for MCBs of the SB200 series up to 63 A, and RCCBs of the FB200 series up to 100 A and RCBOs DS201, Suitable for SDB200 switch disconnectors series.

S2C-Nt

2CSC400005F0201

Hand operated neutral left side mounted		
		S2C-Nt
Rated current	A	max. 40
Terminal	mm <sup>2</sup>	10; cage terminal
Tightening torque	Nm	1.2
Dimensions (H x D x W)	mm	85 x 69 x 8.8

### Hand operated neutral

The hand operated neutral has to be mounted to the left side of the MCB and be snapped onto the DIN rail. It is used for measuring duties where the neutral conductor must be in the open position. Due to the special design of the handle - when switching ON the MCB - the neutral will make before the MCB is closed. Suitable for SDB200 switch disconnectors series. The S2C - Nt is not to switch with a tool (screwdriver).

# OVR T1-T2, T2 and T2-T3 ranges. The details make the difference

A complete range for your surge protection

Pluggable cartridge for easy replacement during maintenance operations

Clear information on the front of the product indicating the technical characteristics of the OVR.

Safety Reserve system with two varistors per line to extend protection lifetime.

OVR series is using same terminal as Pro M compact devices to guarantee a complete coordination and time saving in wiring operation. All devices allow connection through busbars, both from top and bottom terminals.

The pluggable feature of ABB **OVR T1-T2, T2 and T2-T3** surge protective devices (SPDs) facilitates maintenance. Should one or more worn cartridges need to be replaced, the electrical circuit does not have to be isolated nor do the wires have to be removed.

The end-of-life indicator of the SPD signals the status of the device. A mechanical indicator turns from green to red when the SPD reaches the end of its life, when the end-of-life indicator is fitted.

The toggle of the miniature circuit breaker indicates the status of the **OVR Plus** range. If the toggle is on, the surge protection is active. If the toggle is off and can be switched on again, the device has protected your equipment. If the toggle is off and cannot be switched on, the device must be changed.

A safety reserve system for an extended protection. T1-T2s and T2s. These Surge Protective Devices are equipped with two varistors per pole. If one varistor is damaged, the SPD gives advanced warning that it is approaching the end of its life while the other varistor continues to protect the equipment, allowing to perform Preventive Maintenance.

QuickSafe MOV technology extended to SPD dedicated to D.C photovoltaic applications, bringing soft-protected feature (no back-up needed) up to 10 kA PV short circuit current.

# Circuit Monitoring System

## System overview

The quality of a Circuit Monitoring System is dependent on the strengths of the individual components and how well they interact. ABB's CMS sets the bar particularly high. Regardless of whether we're talking compactness, technology,

measurement results, user friendliness or flexibility, every component and every feature of this CMS has been fully optimized in terms of practicality and functionality.

**Example illustration:**  
Control Unit CMS-700 in combination with CMS open-core sensors

CMS-700

**CMS bus interface**  
A bus interface allows up to 32 sensors to be connected to the Control Unit.

### Control Units

The Control Unit is a kind of computing and communication center that, depending on the equipment connected to it, evaluates the different data picked up by the sensors and makes it available via the built-in interfaces.

You have a choice of three different units depending on your applications: CMS-600 and CMS-700.

### Serial interfaces

Depending on the unit, numerous interfaces and protocols are available to ensure smooth network implementation: RS485 (Modbus RTU), LAN (TCP/IP and Modbus TCP), SNMP v1/v2 and encrypted v3.

Thanks to the built-in web server, an internet browser or a free Android or iOS app can be used to visualize the values measured. What's more, the measured values can also be exported to CSV files.

**Integrate however you want, thanks to multiple mounting options.** Depending on the application, choose between up to four different mounting options to make integrating the CMS sensors in your installation as simple and as uncomplicated as possible.

**Universally usable sensor designs**

**Mounting on a DIN rail**  
CMS-120DR, CMS-100DR, and CMS-200DR series sensors can be mounted on all DIN rails with the aid of a DIN rail mounting.

**Cable tie mounting**  
If space is at a real premium, CMS-120CA, CMS-100CA, and CMS-200CA series sensors can be secured directly to the cable(s) to be measured by means of cable ties.

**Tangible value addition for you ABB circuit monitoring pays off two-fold**

**Early warning system (predictive maintenance) for increasing the availability of critical consumers**  
Continuous monitoring of the current flow at the circuit breaker makes it possible to detect overloaded lines before they lead to a service interruption. Apart from this, monitoring individual circuits indicates whether the loads are in the desired operating mode or not. In this way, system deviations can be ascertained instantaneously. What's more, the CMS can be used to detect unbalanced loads before they result in failure of the neutral conductor and consequently load failure.

**Cost analysis to reduce and assign energy costs**  
The cost of energy will rise continuously. In order to cut costs, you first have to know where they arise. The Control Unit helps illustrate and analyze the instantaneous energy consumption levels. Furthermore, the calculated active energy can be used to roughly allocate the costs at the output level.
